

## QUALITY POLICY STATEMENT

**HITEC WELDING PTY LTD** performs material supply, product planning, design, shop detailing, fabrication, electrical and instrumentation, welding and installation of pressure piping and process plant equipment to meet or exceed all of our customer's expectations with respect to quality, cost and delivery.

We manage and maintain a quality management framework and process to assure, measure, record and document the requirements placed upon us.

The quality policy intent is communicated at all levels of the organisation. This process requires a commitment to the ongoing training of our people, the continued search for self-improvement and, as a result, the achievement of target cost, work schedule, specification, nil rework and nil incidents or injuries to our infrastructure or employees.

We recognise that every job we do is part of a collective effort and we will actively cooperate with our clients, our suppliers and all other parties that may be involved in the job we do. Hitec Welding believes that the best projects are those in which success is shared.

This policy is subject to Management Review every 12 months.
